

We're so proud of what we've helped make happen. A safe, cheerful place where small children can learn the kind of skills they'll build on for their future. The Bridges of Hope for Children team have pulled out all the stops to make it happen, and today Annabelle visited with more donations and gift bags for all the children - only to find that the class of 27 has grown to 32. We'll make a plan.

But our job isn't done yet.

These children need more than a classroom because nourishing their minds is not enough. Each child needs a mid-morning snack and a healthy lunch before they go home at the end of their school day.

The classroom is looking great! August 2019
